

KAMIL JONAK

PHP DEVELOPER

EXPERIENCE

PHP Developer | DevOps Linkfactory | 2021/12 - now

I was creating, supporting and maintaining multiple applications such as Rotary Denmark, Innovation GrantControl and Kunsten. I worked on backend, using Symfony Framework, also I learned how to create CI/CD pipelines using Jenkins and Gitlab and worked on server infrastructure monitoring it and taking care of all the components being updated. I had my first experience with NoSQL database and searching engine Elasticsearch. I was also planning and presenting changes in our applications to the client.

PHP Developer Webanywhere | 2021/01 - 2021/12

First job in a bigger commercial project. I took part in creating LMS for Medtronic company. I was working on backend, creating REST API using Symfony and API Platform. I tested functionalities using Behat for functional testing and PHPUnit for unit testing. Here I also had first experience with Jira and docker.

Junior Fullstack Developer Grow Business Projects | 2020/02 - 2021/01

I was creating web applications such as educational platform, that resembled Udemy and communication platform, which was set of tools to manage staff and tasks. I took part in creation of mobile app for performing audits. I worked with various technologies mainly Symfony, Xamarin, JQuery, HTML, CSS and in Git version control system.
